invigormate™

**Mycorrhizal
Growth
Promoting
Bio-inoculant**

invigormate is a safe, natural Mycorrhizal and Trichoderma bio-inoculant that promotes plant vigor, growth and yields.

invigormate is formulated as a wettable powder to inoculate indoor and field crops, orchards and vineyards.

Active ingredient: **invigormate** contains an optimum combination of selected strains of two plant beneficial fungi (minimum activity 10 million spores per gram) combined with natural sugars and root growth stimulators. Low host specificity endomycorrhizae fungi (Glomus species) that quickly colonize the roots of most plants are combined with especially selected Trichoderma fungi that are plant vigor and growth promoting which rapidly grow in and around the root zone.

A Natural all-purpose Root and Soil ecosystem enhancer
1.5 kg net

invigormate™

Crop	Rate
Glasshouse/Indoor crops	1.5 kg / 5000m ²
Field crops	1.5 kg / hectare
Orchards & Vineyards	1.5 kg / hectare

Precautions for use

- Keep out of reach of children
- Best stored in a cool place.
- To avoid airborne particles wear mask when mixing powder with water
- Wash hands and exposed skin before meals and after using
- Crush the empty sachet and bury in approved landfill
- Do not contaminate water supply with material or the empty pack
- Use contents within 28 days of opening sachet

Mixing and application

Ensure the mixing tank has been thoroughly washed to remove any chemical residues before mixing **invigormate** with fresh clean water. Always pre-mix **invigormate** by adding the powder at the rate of 500g to a minimum of 5 litres water. Mix well before adding to the dispensing tank that should contain a minimum of 50 litres of water and be continuously agitated during application. Surface application utilizing a soil penetrant followed by irrigation of the treated area will ensure good root contact.

For micro delivery systems, dripper and T-tape etc. apply by venturi into the main line downstream of any filters after 70%-85% of the cycle is complete. Always flush with clean water for the final 15% of the cycle.

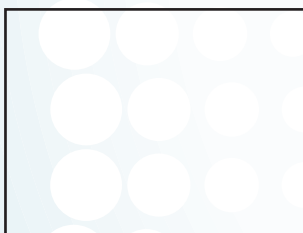

For boom spray applications use high water rates of at least 1000 L per hectare or apply during light rainfall.

invigormate may be applied with most fertilizers. Always check for compatibility before applying with any chemical pesticides.

NOTICE TO BUYER: The manufacturer of **invigormate** makes no warranty of any kind on the use of this product and accepts no liability for results from its use whether used in accordance with the label directions or otherwise.
